Notice of Nonresponsive Amendment

Notice of Nonresponsive Amendment

The amendment filed on 8/4/2003 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected (i.e. originally presented and therefore originally elected) invention because the original claims were directed to a method of inhibiting a decrease of “anti-oxidant” activity in PLANTS. The original claims did not recite any limitations with regard to particular substances in the plants which were to be acted upon, nor did the original claims recite any method of inhibiting “anti-oxidant” activity in isolated compounds. The original claims did not recite any method of use or treatment of alpha-glucosyl-hesperidin or catechin. New claims 37-38 are directed to inhibiting a decrease of “anti-oxidant” activity in alpha-glucosyl-hesperidin or catechin. The new claims do not recite that the compounds are those comprised within or isolated from plants. The originally filed specification does not disclose that the compounds recited in new claims 37-38 are found in plants, were isolated from plants, or are known to be produced by plants. As the new claims are directed to a different result and recite use of different products than were the originally filed claims, they are not considered part of the originally elected invention. It is noted that applicant has received several actions on the merits for the originally presented invention.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the

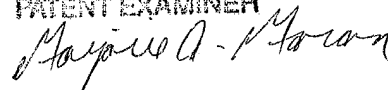

omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
